

DESCRIPTION

RPR Products Insul-Mate stainless steel elbow covers are formed from .016" thick, Type 316 stainless steel. The elbow covers are manufactured to conform to ASTM C-450 specifications in 90 degree and 45 degree configurations in sizes ranging from 1/2" to 12" nominal iron pipe. Type-316 stainless steel elbow covers are available in smooth finish only.

APPLICATIONS

Type-316 stainless steel is more resistant to atmospheric and general corrosive conditions than any of the other standard stainless steels. It is recommended for installation in highly corrosive environments and where high temperatures are factors.
